## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-68 are allowed.

The following is an examiner's statement of reasons for allowance:

There are a number of patents and patent applications filed by Farr et al, which read on the allowed subject matter and which were all filed within 3 months of each other. However, given that the applicant has filed a declaration under section 1.132 with regards to one such application (US PgPub 20040223021 A1), the examiner did not find it necessary to issue a new rejection over the additional patents and publications, assuming that applicant would also file declarations under section 1.132 with regards to each. No other art was found which read on the allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Farr et al (US Pat 6929343) discloses a fluid detection system.

Farr et al (US PgPub 20040218000) discloses a printing device having a printing fluid detection system.
